Abhishek Kumar

Quality Engineer | Tricentis Tosca

Gurugram, India | +91 84486 36006 | rajputabhishek677@gmail.com | linkedin.com/in/abhishek-kumar2301

PROFESSIONAL SUMMARY

Quality Engineer with 5 years of experience in Tricentis Tosca test automation across insurance (Allianz) and healthcare (UnitedHealth Group) domains, covering web, desktop and REST/SOAP API testing. Skilled in building reusable XScan module libraries, data-driven test case design (TCD) and distributed parallel execution (DEX). Cut regression cycle time by 40% and recognized with four awards, including the UnitedHealth Group Bravo! Diamond Award for catching a critical production defect.

CORE COMPETENCIES

- Tricentis Tosca
- TBox Automation
- XScan
- Tosca API Scan
- TCD
- DEX
- TQL
- Test Automation Framework Design
- Regression Automation
- API Testing (REST/SOAP)
- Risk-based Testing
- Test Data Management
- Agile/Scrum
- Insurance & Healthcare Domains

EXPERIENCE

Optum Global Solutions *Nov 2025 – Present*

Quality Engineer | Gurugram, India

- Automate end-to-end scenarios for healthcare web and desktop applications in Tricentis Tosca, adding 130+ automated test cases to the regression suite.
- Extend the shared XScan module library for new screens, reusing existing modules to keep suite maintenance low.
- Design parameterized, data-driven test cases in Tosca TCD to validate new features every sprint.
- Run functional and smoke cycles each sprint and execute 200+ regression test cases daily.
- Configure Recovery and Cleanup Scenarios that keep unattended runs stable through application and environment failures.
- Triage, log and track defects in Jira with developers through to retest and closure; escalated a critical production-impacting defect recognized with the Bravo! Diamond Award.
- Publish daily regression reports on suite health, pass rates and failure trends for stakeholders.

Expleo Group *Sep 2021 – Nov 2025*

Senior Software Engineer | Pune, India

- Designed 300+ Tosca test cases for Allianz insurance web and desktop applications and maintained the existing regression suite, keeping it stable and up to date across releases.
- Established the team’s reusable UI module standards with Tosca XScan, extending automation to new interfaces and cutting maintenance effort by 50%.
- Built data-driven, parameterized test case designs in Tosca TCD, letting one test cover many data combinations and scaling coverage across multiple insurance product lines.
- Automated 120 of 300+ manual REST and SOAP API test cases with Tosca API Scan (~40% of the API suite), validating response codes, payloads, headers and authentication.
- Ran distributed, parallel regression runs through Tosca DEX across multiple remote agents using TestEvents and scheduled executions, contributing to the 40% reduction in regression cycle time.
- Standardized test logic with shared TestSheets, Reusable TestStep Blocks and business rule templates; used TQL searches for bulk maintenance of test artifacts.
- Shaped release-level test strategy covering scope, risk coverage and test data planning.
- Mentored junior teammates through automation and test case reviews, and led retrospectives that improved team-wide QA practices.

TECHNICAL SKILLS

- **Test automation:** Tricentis Tosca, XScan, reusable Modules, Reusable TestStep Blocks (RTBs), Buffers, TCD, TQL, recovery and cleanup scenarios.
- **API testing:** Tosca API Scan, REST, SOAP, Postman, SoapUI; response codes, payloads, headers and authentication validation.
- **Test execution:** Tosca DEX, Agents, TestEvents, ExecutionLists; distributed and parallel runs.
- **Testing types:** Functional, regression, smoke, API, UI, database and end-to-end testing.
- **Defect and collaboration:** Jira, Confluence, ALM, Rally.
- **Methodologies:** Agile Scrum/Kanban, SDLC, STLC.
- **Database:** SQL (MySQL); data validation and integrity checks.
- **Current learning:** CI/CD integration for Tosca, including pipeline-triggered execution and automated result reporting.

KEY ACHIEVEMENTS

- Cut regression cycle time by 40% by modularizing test cases and running them in parallel on Tosca DEX.
- Converted ~40% of the manual API suite (120 of 300+ REST/SOAP test cases) into automated Tosca tests, removing repetitive manual execution.
- Reduced test maintenance effort by 50% by building reusable templates and centralizing test data in TCD.
- Supported stable releases across sprint cycles and UAT readiness, earning client recognition for delivery quality.
- Delivered critical automation ahead of schedule, giving teams earlier feedback in each QA cycle.

CERTIFICATIONS AND TRAINING

- **Tricentis Academy:** Automation Specialist Levels 1 and 2 (AS1, AS2); Test Design Specialist Levels 1 and 2 (TDS1, TDS2); Automation Engineer Level 1 (AE1); Tosca Deep Dive – Automating API Test Cases; Tosca Query Language (TQL).
- **ISTQB:** Certified Tester – Foundation Level (CTFL).
- **Additional credentials and training:** Allianz ABS Level 1; SQL certification; Agile with Atlassian Jira.
- **Generative AI:** Optum.ai AI Dojo (Mar 2026).

AWARDS AND RECOGNITION

- **Bravo! Diamond Award – UnitedHealth Group (Jun 2026):** Identified and escalated a critical production-impacting defect as part of the Tosca Automation team.
- **Bold Mind Award – Expleo Group (Dec 2024):** Recognized for innovative Tosca solutions and test strategy improvements.
- **Applause Award – Expleo Group (Apr 2024):** Recognized for reducing regression cycle time through automation optimization.
- **WoW Award – Expleo Group (Sep 2023):** Recognized for contributions to enterprise automation delivery.

EDUCATION

Galgotias University *2021*

Bachelor of Technology in Computer Science and Engineering | Greater Noida, India
