Professional Summary

Quality Engineer with 5 years of experience in test automation, API validation and Agile quality assurance. Skilled in designing and maintaining Tricentis Tosca suites, including reusable XScan modules, data-driven test design (TCD) and distributed execution (DEX). Experienced in defect lifecycle management and regression planning, with awards for automation delivery and test strategy improvements. Currently building knowledge of CI/CD integration for Tosca.

Core Competencies

Test case design | Test data management | Risk-based testing | Requirement analysis
Regression planning | Agile test strategy | Functional coverage mapping
Release cycle alignment | Sprint-level testing

Experience

Optum Global Solutions *Nov 2025 - Present*

Quality Engineer | Gurugram, India

- Develop and maintain automation suites for web and desktop applications in Tricentis Tosca within the team's established framework.
- Build and maintain reusable UI modules through Tosca XScan to broaden automation coverage across interfaces.
- Design parameterized, data-driven test cases in Tosca TCD to validate new feature functionality.
- Execute functional, smoke and regression cycles each sprint in line with Agile ceremonies.
- Configure recovery and cleanup scenarios to keep test runs reliable during unstable application or environment states.
- Triage, log and track defects in Jira, partnering with developers to resolve issues and manage retesting.
- Publish daily regression reports on suite health and execution results.

Expleo Group *Sep 2021 - Nov 2025*

Senior Software Engineer | Pune, India

Allianz Germany | Insurance applications | Web, desktop and API testing

- Designed and delivered end-to-end Tosca automation suites for web and desktop applications, from test design through rollout.
- Developed the team's reusable UI module standards with Tosca XScan, extending automation feasibility to new interfaces.
- Created data-driven, parameterized test frameworks in Tosca TCD to scale testing across multiple product lines.
- Developed REST and SOAP API test coverage, validating response codes, payloads and headers.
- Executed distributed, parallel tests through Tosca DEX across remote agents using TestEvents and scheduled runs.
- Standardized test logic with shared TestSheets and business rule templates; used TQL searches to identify artifacts for bulk maintenance.
- Contributed to release-level test strategy, including scope, risk coverage and test data planning.
- Mentored teammates through automation and test reviews and led retrospectives to improve team-wide QA practices.

Technical Skills

- **Test automation:** Tricentis Tosca, XScan, reusable Modules, Reusable TestStep Blocks (RTBs), Buffers, TCD, TQL, recovery and cleanup scenarios.
- **API testing:** Tosca API, REST, SOAP, Postman, SoapUI; response codes, payloads, headers and authentication validation.
- **Test execution:** Tosca DEX, Agents, TestEvents, ExecutionLists; distributed and parallel runs.
- **Testing types:** Functional, regression, smoke, API, UI, database and end-to-end testing.
- **Defect and collaboration:** Jira, Confluence, ALM, Rally.
- **Methodologies:** Agile Scrum/Kanban, SDLC, STLC.
- **Databases:** MySQL, SQL; data validation and integrity checks.
- **Documentation:** Microsoft Word, Excel and PowerPoint.
- **Current learning:** CI/CD integration for Tosca, including pipeline-triggered execution and automated result reporting.

Key Achievements

- Reduced regression cycle duration by modularizing test cases and enabling distributed execution.
- Increased API test coverage through automated validation of payloads, status codes and authentication.
- Minimized maintenance effort by building reusable templates and centralizing test data in TCD.
- Improved Tosca DEX throughput by distributing tests across agents and optimizing parallel run configuration.
- Supported stable releases across sprint cycles and UAT readiness, with client recognition for delivery quality.
- Delivered critical automation ahead of schedule, improving QA timelines and early feedback cycles.

Certifications and Training

- **Tricentis Academy:** Automation Specialist Levels 1 and 2 (AS1, AS2); Test Design Specialist Levels 1 and 2 (TDS1, TDS2); Automation Engineer Level 1 (AE1); Tosca Deep Dive - Automating API Test Cases; Tosca Query Language (TQL).
- **ISTQB:** Certified Tester - Foundation Level (CTFL).
- **Additional credentials and training:** Allianz ABS Level 1; SQL certification; Agile with Atlassian Jira.
- **Generative AI:** Optum.ai AI Dojo (Mar 2026).

Awards and Recognition

- **Bravo! Diamond Award - UnitedHealth Group (Jun 2026):** Proactively identified and escalated a critical defect affecting production in the Tosca Automation team.
- **Bold Mind Award - Expleo Group (Dec 2024):** Recognized for innovative Tosca solutions and test strategy improvements.
- **Applause Award - Expleo Group (Apr 2024):** Recognized for reducing regression cycle time through automation optimization.
- **WoW Award - Expleo Group (Sep 2023):** Recognized for contributions to enterprise automation delivery.

Education

Galgotias University *2021*
Bachelor of Technology in Computer Science and Engineering | Greater Noida, India
